

Greater Boston Region

See reverse for partial company, academic institution, and hospital lists

Anchored in Cambridge, the life science industry in the Greater Boston region is one of the most dynamic industry clusters of any kind in the world. In addition to over 240 biotechnology companies, the top 5 NIH-funded hospitals in the nation, and many of the world's leading research universities, the region is also one of the world's premier financial centers. These factors combine to make the region unsurpassed for research and development.

Graph includes employment figures for Suffolk, Norfolk, and Middlesex counties. A part of Middlesex County is considered part of the Northeast region. Source: Bureau of Labor Statistics.

The Greater Boston region is the hub of New England's highway network, with I-90, I-95, and I-93 collectively forming the spokes and rim of the figurative wheel. From Boston emanates the MBTA subway, and commuter rail system, which serves a geographic area of over 750 square miles. In addition, Boston is served by Logan International Airport, which provides service to 76 domestic and 33 international destinations.
